

Environmental Policy Statement

It is the policy of Abzorboil Ltd. to manage all of its activities so as to give benefit to society, ensuring that they meet relevant laws and regulations, are acceptable to our customers and the community at large and that their environmental impact is reduced to a practicable minimum. In so doing, Abzorboil Ltd. will ensure compliance with its responsibilities under UK environmental legislation.

There are two areas in which Abzorboil Ltd. has a large impact on the environment; the energy consumed by our vehicles and in our operating centres. We will positively influence environmental awareness and compliance on all issues but with particular emphasis on these two areas. We will continue to maximize the efficiency of our use of consumed energy through the adoption of an efficient transport policy for our personnel, goods and services and we will monitor and hence control and continue to reduce the energy used at our operating premises.

We will check and minimize the environmental impact of physical assets under our control over their total life cycle and select those that have the minimum effect.

We will ensure that our procedures for disposing of all waste materials comply with applicable legislation and our and others duty of care.

Abzorboil Ltd. will:

- Encourage and promote best practice and continuous improvement in environmental performance.
- Commit to the prevention of environmental pollution in relation to Abzorboil Ltd.'s activities
- Provide information and assistance to ensure that materials are used, stored and disposed of in a safe and environmentally responsible manner.
- Promote an open exchange of environmental information with customers and suppliers and provide appropriate environmental training.
- Comply with the requirements of its customer's environmental policies.

This policy Statement will be formally reviewed on an annual basis.
